

Physical Education Curriculum Statement

Intent:

At Wyke, PE is challenging, fulfilling, engaging and exciting. It develops each child as a participant, a learner and a lover of physical activity and sports. Children are able to discuss the benefits of leading an active lifestyle on both their physical and mental wellbeing. They are able to express how it can develop positive emotional and social skills that help them throughout the school.

The children at Wyke understand the importance of resilience, self-belief, determination and being a team-player. These skills are encouraged and are at the core of each PE, games and physical activity session. These principles are supported within the wider school environment by all staff.

Implementation:

- all children across Key Stage 1 and 2 take part in two PE sessions a week, developing and embedding skills and applying them to more formal game situations. Our EYFS also take part in one PE session a week to develop their skills
- there is a range of extra-curricular activities led by school staff and external providers
- each child has the opportunity to participate in inter-class and inter-school competitions in a range of sporting endeavours.

Impact:

During their time at Wyke Primary School, children will:

- develop a passion for physical activity and sport
- understand the importance and value of leading an active and healthy lifestyle
- grow emotional resilience and determination, as well as developing social skills that can be applied in the wider school community.
